Github : @mialtgg

CAREER OBJECTIVE

I began my software journey with frontend development, gaining experience in frontend development with React. During my work and internship experiences, I actively participated in designing various websites using Django for use within our university. This involved playing an active role in database management, backend, frontend, and deployment aspects. Additionally, I had the opportunity to work with Windows IIS and MsSQL.

SKILSS

BACK END DEVELOPMENT
Python-Java

FRONT END DEVELOPMENT
Javascript -React

OTHERS
MS SQL- Postman- Git - Firebase-HTML-CSS

EDUCATION

MANİSA CELAL BAYAR UNIVERSITY (%100 english)
2020 | 2025

LANGUAGES

English: Professional Working Proficiency

WORK EXPERIENCE

MCBU Computer Research and Application Center

Full stack web developer   **10/05/2023 -17 /05/2024**

I took an active role in the database, backend, frontend and deployment sections by designing various systems with Django. In addition, I had the opportunity to work with technologies such as Windows IIS and MsSQL. I worked on a series of projects to meet the needs of the MCBÜ Rectorate Private Secretary, the computer research and application center and the university. During this process, I gained only frontend development experience in some projects and fullstack experience in others.

CodeCo Soft   **08/08/2023 - Present**
Backend Intern - Python

We recoded the company website we developed with Django using REST API to make it mobile application compatible. During this process, we took various actions to ensure JWT token integrations and data security. I had the opportunity to do in-depth research to maximize my Django knowledge.

PROJECTS

Web developer Ethics committee automation - https://etik.cbu.edu.tr/

II contributed to the data visualization section of the frontend of the ethics committee automation, I made the charts dynamic with API, I used different chart libraries.

MCBU appointment tracking - https://okm.mcbu.edu.tr/

In these full stack projects that belong to me, I developed the frontend with the help of HTML, CSS,Bootsrap and templates, visualized the data with charts and reported it, gained experience in transferring to Excel, and improved my backend knowledge by using Python, Django for the backend.

MCBU BAUM inventory tracking system - present
